

Faster. Farther. Connected.

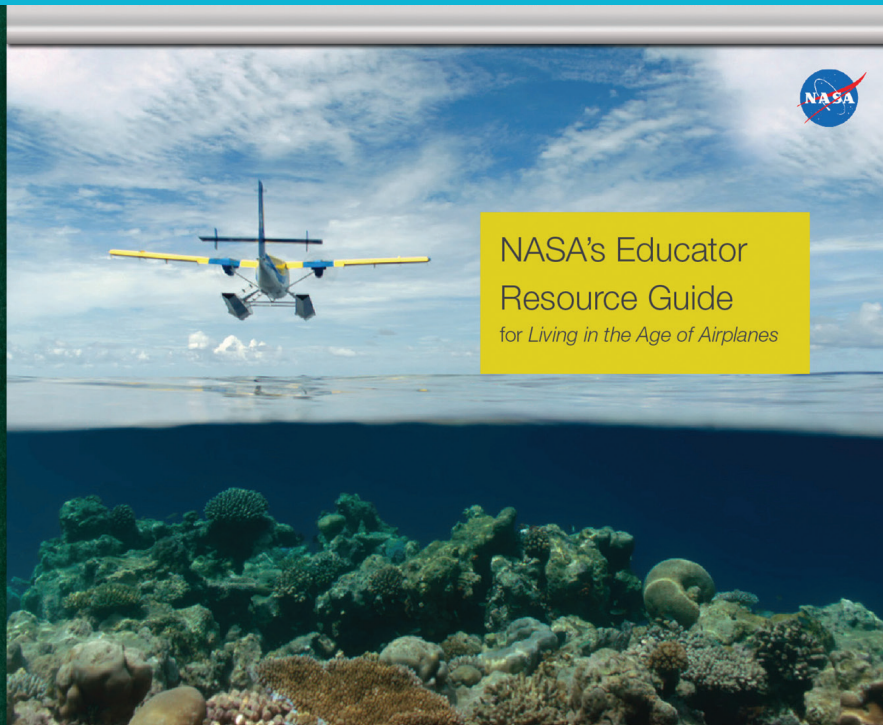

Activities:

Math

Air Traffic Control
Map-mapping

Economics
of world trade
by air cargo

Physics of Motion

For teachers
of Pre-K
through
grade 12

* Bonus *
Children's
storybook included!

NASA's Educator Resource Guide

for Living in the Age of Airplanes

a film presented by National Geographic Studios

Created by NASA Aeronautics, this guide provides three sets of lessons that focus on the thematic elements of the film: airplanes help us to travel **faster**, go **farther**, and make us more **connected** than ever before.

Living in the Age of Airplanes – narrated by Harrison Ford and presented by National Geographic Studios – tells a visually stunning story of how, in the relative blink of an eye, air transportation has entered the scene and changed forever how humans connect with others, reach far-flung places, and access products from many different countries.
